Work Experience

Changing Health - Digital Product Architect

(March 2019 - Present)

Assisting the product lead in the construction of health care educational programs on the Changing Health Platform.

Projects which I am responsible for include:

- Constructing programs using the Changing Health platform, for both internal and external partners
- Creating data flows and user flow documentation
- Create visual mockups and interactive prototypes of proposed UX/UI solutions
- Help to provide information to inform UX Reviews, and review feedback in order to scope new Platform functionality requirements

Changing Health - Junior Designer

(March 2017 - February 2019)

Working beside the head of design to design for both print and digital. Helping to design and prototype new features for the Changing Health app, create promotional material.

Status Digital - Digital Design Internship

(May 2016 - June 2016)

Working with the Head of UX to create digital experiences, and helping to create branding concepts

Squegg - Design Intern

(January 2016 - April 2016)

Worked with the Head of design to create branding work for clients.

Camerons Brewery - Design Intern

(May 2013 - July 2013)

Helped to create branding concepts as part of the companies rebranding work, also helped to create promotional material for the visitor center.
